

Do you have Parkinson's Disease and experience difficulties with your walking?

A white icon of a person walking on a path with diagonal lines, set against a blue background.

If so, we would like to invite you to participate in our study that looks at how technology can potentially improve walking.

Participant eligibility

- Early stage Parkinson's patient
- Not taking medication or recently commenced medication
- Experience mild gait impairments
- Have no hearing loss

Potential benefits

- Review your gait performance
- Try out new technology and provide feedback at an early stage of development

Participation Involves

- Walking while following a set of metronome beats
- Sharing your experience on living with Parkinson's

Study details

- Location: Monash University Clayton campus
- Duration: 1.5 - 2 hrs
- Travelling cost will be covered

For more information

- Please contact Tina at 04-22972886 or lee.wu@monash.edu
- You may need to provide additional information for screening purposes
